

ROTARY SWITCHES

Single pole multi-position, general purpose rotary switch. This switch features a nylon actuator in a metal clad construction along with a self-cleaning silver plated contact design. Typically used in applications requiring multi-position speed controls, such as electric fans.

Product Highlights:

- ♦ Double “D” bushing mount
- ♦ Sturdy metal clad construction

Typical Applications:

- ♦ Small Appliance
- ♦ Industrial Control
- ♦ Marine

Dielectric Strength

UL/CSA: 1000V (minimum)

Base Material

Steel/Zinc Plate

Insulation Resistance

100 Megohms (minimum)

Actuator Material

Brass/Nickel Plate
